

Thinking of you

 **Electrolux**

electrolux oxygen
central vacuum systems

We were thinking
- clean air should
be built into your
home.

Electrolux Oxygen central vacuums systems were designed with consumer insight in mind. Consumers express a growing demand for products with attention-attracting style, advanced technology and health benefits. Oxygen answers this insight with a built-in solution.

Nothing but 99.97% clean air

With tight insulation and unsatisfactory ventilation and moisture, indoor air is often 2 to 5 times more polluted than outdoor air. The new Oxygen from Electrolux features a unique double filtration system. First, the Goretex self-cleaning filter offers worry-free performance and no need to use a paper bag. Secondly, the exclusive True HEPA filter purifies the air to 99.97% and then diffuses it through our soft air diffusion system eliminating the need to exhaust outside.

Intelligent design

An Oxygen central vacuum system is streamlined and quiet yet, robust and powerful. It offers easy to understand functionality with advanced information displays and benefits all who care about their health and a clean home. Oxygen was designed not only to have attention attracting style but to focus on consumer insight.

Electrolux Oxygen - clean air, built-in

The Oxygen central vacuum unit is placed in a secondary space like a utility room or garage. It is connected to a system of pipes between walls and beams during construction or can easily be fitted to an existing home. The wall outlets are positioned as centrally as possible. From strategically positioned outlets you can reach every spot in the house. In most cases one can manage with only two outlets.

A woman in a light grey long-sleeved top and blue jeans is using a white corded stick vacuum cleaner on a light-colored shag rug in a modern living room. A man in a light green shirt is sitting on a white sofa in the background, working on a laptop. The room features large windows with white curtains, a fireplace with a fire, and a small table with a globe and books. The overall atmosphere is bright and clean.

Optimal cleaning,
everywhere. everytime.

Innovative, quiet and effective - by design.

Electrolux Oxygen offers four models differing in features and performance levels depending on the size of your home and specific cleaning needs. Regardless of the model you choose, you get a highly effective, durable and quiet central vacuum that helps you keep your home clean year after year.

ZCV875

- Ultimate performance
- True HEPA filtration
- Lowest sound level of series
- LCD display provides information on performance, maintenance and use
- Industry leading Goretex self-cleaning filter
- High filtration with cyclonic separation

ZCV870

- Superior performance
- LCD display provides information on performance, maintenance and use
- Industry leading Goretex self-cleaning filter
- High filtration with cyclonic separation

ZCV860

- High performance
- LED indicator for maintenance notifications
- Industry leading Goretex self-cleaning filter
- High filtration with cyclonic separation

ZCV855

- Great performance
- Industry leading Goretex self-cleaning filter
- High filtration with cyclonic separation

Design Innovator

Innovative features designed with you in mind from the world's largest manufacturer of vacuums. These unique features have been developed to make the cleaning task of vacuuming as effective and intuitive as possible.

Quick release bucket

Goretex Self-cleaning filter

Quick release bucket

The handles with push button release allow for easy removal of the bucket and stability whether taking the bucket off or putting it on.

Goretex Self-cleaning filter

The Oxygen series power units are equipped with a self-cleaning filter that maximizes filtration, everytime. The filter moves up and down during each cleaning cycle, which means that dust is "swept off" the filter surface. This filter is permanent does not have to be cleaned during normal use.

Integrated silencer

Information display

Integrated Silencer

With the innovative design of the integrated silencer all Oxygen power units come with reduced noise levels. This design requires less space for installation and provides a more quiet and effective experience.

Information display ZCV875 & ZCV870

The information display provides you with relevant information on your cleaning system.

- Performance Indicator
- Empty bucket indicator
- Service Indicator
- Time used

True HEPA filtration

Dust bag

True HEPA filtration

The only central vacuum with True HEPA provides amazingly clean air that does not have to be exhausted outside. The perfect solution for health concerned persons. The HEPA filter is included on the ZCV875 and can be added to any of the other models.

Optional paper bag attachment

For an added level of convenience a dust bag is adaptable to all Oxygen power units. The dust bag provides an easy way to dispose of debris.

A complete cleaning system

All aspects of your central vacuum system have been designed to work together - seamlessly. Innovative, unique designs of attachments provide you with an optimal cleaning experience.

Oxygen handle

Active control switch

Active pickup tool

Integrated cleaning tools

Hose set

Oxygen handle

The uniquely designed optimal airflow shape achieves maximum suction with reduced noise. The Oxygen handle provides a dynamic interface with your Oxygen power unit. It offers the insight driven solutions described below to complete the central vacuum system.

Active control switch

With the 3 position switch you always have total control over your cleaning power in your hand. The switch goes from OFF to Medium speed for cleaning more delicate surfaces, and then to High speed for the complete power necessary for deep cleaning.

Active pickup tool

This exclusively designed Electrolux tool gives optimal front action on hard floors and features automatic regulation of the airflow on soft carpets. The Active pickup tool is lightweight and provides superior handling for easier cleaning on all floor types.

Integrated cleaning tools

Located on the handle are optimally sized cleaning tools. The crevice tool helps in reaching narrow spaces and the dusting brush is perfect for all dusting needs. With the integrated tools on the Oxygen handle, you always have the above floor cleaning tools at hand.

Hose set

Everything you need to effectively clean your home. The Oxygen hose set is available in 9 meter, 10 meter and 12 meter to fit virtually any home application. With the unique optimal airflow design the Oxygen hose set is unmatched for cleaning ease and performance.

The Thoughtful Design Innovator.

Do you remember the last time you opened a gift that made you say, "Oh! How did you know? That's exactly what I wanted!" That's the kind of feeling that we at Electrolux seek to evoke in everyone who chooses or uses one of our products. We devote time, knowledge, and a great deal of thought to anticipating and creating the kind of appliances that our customers really need and want.

This kind of thoughtful care means innovating with insight. Not design for design's sake, but design for the user's sake. For us, thoughtful design means making appliances easier to use and tasks more enjoyable to perform, freeing our customers to experience the ultimate 21st century luxury: ease of mind. Our aim is to make this ease of mind more available to more people in more parts of their everyday lives, all over the world.

The "Thinking of you" promise from Electrolux goes beyond meeting the needs of today's consumers. It also means we're committed to making appliances safe for the environment—now and for future generations.

Electrolux. Thinking of you.
